```java
package player;

import gen.Derivative;
import gen.Pair;

import java.util.Comparator;

// Sorts based on the value of the given Double
public class MoreProfitable implements Comparator<Pair<Derivative, Double>> {
        @Override
        public int compare(Pair<Derivative, Double> p0, Pair<Derivative, Double> p1) {
                return (p0.b < p1.b)? 1 : -1;
        }

}
```
