Good overall!

Will work on making lectures more clear.

Please stop me if anything is not clear!

Also take advantage of my and TA's office hours

Next we go through the comments.

First of all, **THANK YOU** for all the nice comments!!!

Comment:

More office hours

Can TA have more office hours?

Answer:

YES! We are always happy to have more office hours!

Just let me know after class/post on Piazza/email

We will find a time that works for you!

Comment:

PS3 should be due 1 week after handout

Answer:

Done, see post on Piazza. It is now due by Tuesday
November 6th at 5PM.

Comment: More examples of how to do problems
More practice sets with solutions

Answer:

Will try to add more, but there is a tradeoff between problems solved in class and material to cover.

At home, going through the slides and doing the homework should be enough.

Try to solve extra problems I mention during lectures, then stop by office hours to discuss your solutions!

Comment: Wish homework more reflective of current class material

Answer:

Current pipeline:

Homework is out

Chance to come to office hours

Homework is graded and discussed

Chance to come to office hours

Quiz

Comment: Scaling weird, not many points

Answer:

Not sure about this.

Always think of your grade as a number in $[0,1]$.

Comment: Slides don't stand well on their own

Answer:

That's why I am here ;-)
